BioBox[®]

is an innovative system
consisting of a small ventilated
basket and a special liner which:

is breathable

allowing the air to pass through, resulting in the evaporation of a significant quantity of moisture

eliminates odours and prevents condensation

by letting the moisture contained in the waste evaporate, avoiding fermentation

increases the life of the bag

and uses breathable sturdy compostable liners

is available in a variety of colours

blue / green / yellow / grey / brown

fully compostable liners

made with Mater-Bi[®] GM-free cornstarch

conforms to European Norm BS EN 13432:2000 for compostability

Unit A1, Summerhouse Farm
Melbourn, Royston
